Subject: submission: for Proposal P1007 - Primary Production and Processing Requirements for Raw Milk
Follow Up Flag: Follow up
Flag Status: Blue

To Whom It May Concern: We are so pleased that there is a possibility that raw milk and cheese product distribution will become legal. It makes no sense for these products to be restricted when so many of our parents and grandparents were brought up on them to no ill-effect. Indeed there are many well-documented advantages to raw dairy. Most of all, we support the move to give Australians freedom of choice in this health/food issue. Yours sincerely, Vikki Kay and Genevieve Ellis
