Submission re Proposal P1007: Primary Production & Processing Requirements for Raw Milk Products.

Dear Sirs

I would like to express my opposition to any ban on production and consumption of raw milk.

As a wife and mother I have researched broadly on nutritional health in order to manage various health issues our family has, as naturally as possible. We do not tolerate commercial milk well, and use natural yoghurt instead, and supplements of acidophilus. I would like to have access to raw milk for it's health benefits. From my reading and discussions with others, raw milk can be produced and consumed safely.

I believe banning raw milk products is a strategy by large scale commercial producers to monopolise milk production. We should have the right to choose what is best for our health, if it does not pose a risk to others in society. Better health in society would solve a lot of social and economic woes.

Yours faithfully

Ann Taylor
