Proposal P1007: Primary Production & Processing Requirements for Raw Products.

I am a dairy farmer who has be raised on raw milk as I have also raised my childeren on raw milk a am a strong believer that it should be avaliable to anyone who wants to have access to raw milk with all its enzymes and vitamins intact and not altered by pasteurisation etc. I have seen too many dairy farmers that have always drunk their own milk until they have left the farm and had to drink carton milk only to find that they are supposedly lactose intolerant. It was never a problem when they had access to raw milk on their own farms. So for these reasons and many more I am in favour of safely produced natural raw milk.
