**Subject:** raw milk legislation changes

Dear Submissions Coordinator,

I have heard that FSANZ are proposing to change the laws relating to raw milk and I would like to submit my view, that I am in favour of safely produced, natural raw milk being available for consumer purchase. It is my understanding that the health concerns relating to TB were valid at the time of the initial legislation, but now that we have stainless steel, refrigeration and safely testing and well cared for cows, raw milk can again be made available for consumption.

yours sincerely,  
Shana Davies
