**GOVERNMENT-IN-CONFIDENCE**

Dear Network Officers and FSANZ Incident Response Team,

NSW DPI have requested the following information be circulated to the Network:

---

Dear Network members,

NSW DPI Biosecurity & Food Safety received confirmation yesterday afternoon that samples and swabs from an additional NSW egg farm and grading facility has tested positive for Salmonella Enteritidis.

The farm, a small supplier located at Rossmore, NSW advises that it only distributes eggs in the greater Sydney area and that eggs are not exported outside NSW. The farm has also advised that they will be conducting a recall. Details to follow through the usual recall process.

The farm was receiving eggs from other farms in NSW that have previously been identified as SE positive. The detection resulted from increased SE surveillance as part of the DPI response to SE risk in NSW.

Any questions please contact

s 22

---

Kind regards,

s 22
