

Application A1035 - Food derived from
Insect-protected Soybean Line MON 87701

I oppose granting consent to this application.

Reason

The applicant has failed to provide safety and nutritional testing of this line, which has been performed by qualified scientific facilities which are clearly independent of, and not in any way sponsored or supported by the applicant, either directly or indirectly.

Therefore, the material supporting this application is provided by facilities with a real or perceived conflict of interest as their funding will depend on outcomes favourable to the applicant.

Paul Elwell Jones.
