Submission Text:	<p>I oppose all parts of this Bill. New Zealand is a GE Free country under legislation. This is a non-negotiable position.</p> <p>GE food products, especially seed including tubers should not be imported into our GE Free environment. The risk of contamination to organic potato production is real. Imagine GE potato peelings ending up in compost or green refuse collection to be made into compost and then this ending up sprouting in the home or commercial gardens of New Zealand. The growing of organic and nutrient dense foods</p>

should be supported and expanded not threatened.
