**Subject:** Submission on A1193 Irradiation of all fresh fruit and vegetables

I have to wonder who is in charge? What is the agenda? For once I find myself without words. Have you not done research? Are you not concerned with side effects (ie direct effects) both on the food quality and consumers?

May I suggest someone actually does some research without consideration of kickbacks or contributing to the burgeoning health crisis? I would suggest stabilised chlorine dioxide, dilute hydrogen peroxide or even ozone.

But irradiation? Speechless.
