Submission Proposal P1022

To Whom It may Concern.

We whole heartedly believe that raw milk and products made from raw milk are generally safer and far more nutritious than pasteurised milk and products made from pasteurised milk. We also believe that it is wrong to refuse people the right to choose what they wish to eat. If you were so concerned about what people eat, why are all manner of carcinogens allowed in food and people are allowed to smoke and drink? Please do the right thing and allow people to make their own decisions as to what they should eat. Please allow raw milk and its products to be sold and consumed unfettered. Please also look at the dangers of pasteurised and homogenised milk.

Thank you  
Cris
