Subject: Food Standards for cheese production in Australia

Categories: Blue Category

I feel strongly against the proposal to change legislation on raw milk cheese, for the following reasons-

--The Proposals exaggerate the risks of raw milk products. Raw milk has a superlative safety record compared to other foods, and even to pasteurized milk.

--The proposals do not address changes to Australian microbiological food Standards which are currently out of step with scientific studies and standards applied in overseas countries.

--The latest proposals will continue the current BAN on the production and sale of all Category 3 products from raw milk. This will include the sale of raw goats' milk currently allowed in some States and further tighten restrictions on raw drinking milk made from cow's milk. No evidence has been put forward as to a food safety justification of why this should be necessary.

--The proposals continue to prohibit farm-consumer sales which are a blatant denial of our rights as consumers.
