

## 007 – Primary Production & Processing Requirements for Raw Milk Products

submission in support of the continued availability of legal, raw goat milk in the market place in  
My reasons for this are as follows:-

reserve a dynamic, competitive, localised raw milk industry, where the consumer has choice of type  
quality of product.

wledge of conditions under which animals are farmed (e.g. organic, free-range, health, animal welfare  
and the knowledge that there are quality control practices in place.

I that any legislation that removes my FREEDOM OF CHOICE to decide between brands and type of milk  
my personal consumption an infringement on my BASIC HUMAN RIGHT to choose and make decisions on  
I manage my own and my families health.

I prefer to use raw goat milk to pasteurised goat milk for the following reasons:

- ☐ Palatability.....
- ☒ Easier digestibility.....
- ☒ Retention of both protective and digestive enzymes.....
- ☒ The integrity of the protein profile and fat profile is not compromised. (some proteins and fats are  
heat sensitive and damaged by the pasteurisation process)

er:.....

as recommended to use raw goat milk by:

☐ Naturopath ☐ Doctor ☒ Other *I grew up drinking raw goats milk and I  
have read much information, from many sources, about the benefits of raw milk.*

It is unfair and against my human rights that I be told that I can no longer purchase my milk of choice.

The current set-up is perfect – the industry is governed by strict health and safety laws, and I can  
purchase my milk with great confidence in its safety. If the sale of raw goats milk becomes illegal people  
will still find a way to access it but without the protections the current legislation provides, and so you  
may find yourself causing the very problems you claim you are trying to avoid. Please ban the sale of  
cigarettes (a carcinogenic product that causes many problems for smokers and non-smokers alike)  
before you target an amazingly healthy product that many people rely on for good health.
