Hello

I am writing from the USA (New York NY) to support raw milk from pastured cows who are not fed any antibiotics or hormones. My story is that I was diagnosed with osteopenia in my spine - reading of 2.5, almost osteoporosis - after 15 months of drinking raw milk, the scan showed that I had nearly reversed this loss - .1. I think it must be completely recovered now, another 10 months later.

I know my farmers and buy directly from as required by NY State law.

Thank you.
