Dear Sir,

Re: Proposal 1007: Primary
Production & Processing Requirements for
Raw Milk Products.

I understand there is the intention
to make changes to the legislation
regarding the sale of raw milk & raw milk
cheese products.

I strongly oppose such changes.
This milk should be freely available to
those who choose to buy it. Just as
cigarettes are freely available to those
who continue to smoke, or drink alcohol.

My body is unable to tolerate
pasteurized dairy products & I now
have osteoporosis due to years of lack
of dairy product. Recently, I discovered
that I could digest & enjoy un-

pasteurised / raw milk so am I last
able to get the quality, calcium & other
vitamins needed to strengthen my bones and
body in general.

There is so much other "food"
available that has proven definitely to
contribute to ill health - sugar, alcohol,
cigarettes, high consumption of
carbohydrates. Do something about this.
But please don't prohibit the sale of
raw milk. If you read a little
wider than the usual journals, you
will see that there is much research that
favours this product. eg. Western A. Price
(USA). Love & Love

Kate Lamont
