To whom it may concern

I have a very strong personal interest in the outcome of this issue for myself and my family.

I strongly believe LEGALISING raw milk is the only way to move forward in Australia to allow production methods of raw milk to be SAFE and CLEAN due to proper market governance and the laws of supply and demand.

I believe this would promote much safer products and in conjunction with a market EDUCATION program by government thereby would allow people the option to CHOOSE whether they wish to consume raw or pasteurized milk products for themselves.

I believe the current laws on pasteurization are archaic and represent the interests of milk suppliers in preference to the interests of milk consumers and is therefore unfair to the people of Australia.

I would be happy to discuss this matter further in an open or closed forum.

Kind regards
