I wish to lodge the following submission regarding Raw Milk.

Submission P 1007 Primary Production and processing Raw Milk

I wish to express my thoughts regarding the legality of accessing raw milk for the general public.

Me and my family drink raw milk, and have done so for several years. I made this decision after researching the benefits of raw milk, and am very pleased we have access to this amazing product.

It is in its pure state as nature intended. Many healthy populations around the world have consumed raw milk for many hundreds of years and they have enjoyed the benefits also.

I believe people should have the option to obtain raw milk for their families if they so choose. Freedom of choice is every person's right, especially regarding what goes into their bodies.
