To whom it may concern,

I am writing this submission in relation to 'Proposal P1007: Primary Production & Processing Requirements for Raw Milk Products'.

I am strongly in favour of safely produced, natural raw milk and believe Australians should be able to choose between raw and pasteurised milk. Personally, my digestive system responds so much better to raw milk and the availability of raw milk products is limiting to my diet.

I think providing manufacturers and consumers with more choices will be advantageous to individuals and Australia as a whole, as we will be able to open up a whole new industry of speciality dairy products.

Kind Regards,

Tansy Boggon
