Subject: SUBMISSION; Proposal P1007: Primary Production & Processing Requirements for Raw Milk Products.

Follow Up Flag: Follow up
Flag Status: Blue

Dear Sirs,

Re: SUBMISSION; Proposal P1007: Primary Production & Processing Requirements for Raw Milk Products.

I wish to state that I am in favor of realistic standards for safe Raw milk being available in the marketplace. I have often consumed Raw milk from a house cow and I can attest to the fact that it is easy to keep the milk in a safe and healthy condition with common sense attention to basic hygiene. I have never had any ill effects from drinking milk this way even though the milking had been done by hand into an open clean bucket, so I would think that machine-milking would be even easier to keep the milk clean as it goes from teat directly into covered refrigerated vessels, as presently done in all dairies.

Sincerely,

Bjoh Earl
