SUBMISSION OF SIMON GREIG RELATING TO: Proposal P1007-Primary Production & Processing Requirements For Raw Milk Products.

I have been drinking raw milk for about 6 months. I do feel better for it.

I think that what we currently do to milk is harming us in the long term. I understand why we process milk, but ultimately, we should always have the choice to drink raw milk. I do not live on a farm and I rely on a supplier to provide the milk. I always want the supplier to be able to supply raw milk. I currently sign an agreement with the supplier knowing that I am taking a risk, but I trust the supplier who has been supplying raw milk to over 300 local people with no harmful effects for about two years.
