Subject: Submission: for Proposal P1007 - Primary Production and Processing Requirements for Raw Milk
Follow Up Flag: Follow up
Flag Status: Blue

To Whom It May Concern,

As a retired person, I try to learn about ways to live a healthy life for my body and the community. Because of this I am very interested in being part of the steps toward reintroducing raw milk and other naturally grown products into our community.

- Easy access to clean, unprocessed milk from local dairies with healthy cattle that are grass fed only
- FSANWZ to reassess outdated science and non-science which condemns raw milk as a carrier of pathogens and consider science based recommendations for consumption of raw milk.
- Certification of raw milk which ensures its cleanliness and its healthful properties remain intact
- Regulations which require raw milk and raw cheeses to be traded ONLY via localised, cottage industry

Thank You

Carolyn Hay
