To whom it may concern,

I am making a submission regarding Proposal P1007: Primary Production & Processing Requirements for Raw Milk Products.

I would think it absolutely fantastic if I was able to buy raw milk and raw milk products for my son and I. I have no concerns about the safety of consuming raw dairy products. I actually become unwell from consuming pasteurised milk and milk products. It irritates my throat and causes excess mucous production which seems to lead to susceptibility to throat infections. My research tells me that raw milk would not cause this problem.

I am also aware of the detrimental effects of homogenised milk, so I would expect that raw milk would be unhomogenised and therefore safer in this regard as well.

My mother and my two siblings also find pasteurised milk causes them problems, and they are also interested to try raw milk.

I certainly hope that you will find a way to legalise the sale of raw milk and raw milk products.

Sincerely, Sharon Parker
