Food-therapeutic good interface product assessment¹

Overview

Product name (include the ARTG # if relevant)	Cabot Health Tyrosine Pure Mood Food 125g powder
Source (consumer complaint, AFP, Customs, review, sponsor, state/territory etc)	Adverse Drug Reaction (Member of Public)
Details/background (Include copies of labels, links to advertising and any other relevant examples of presentation at Attachment 2 of this form)	According to email received, reported as a ADR, as the consumer took the medication and as a result ended up in hospital with what is suspected a reaction to this supplement. The consumer provided as much information about the reaction (D17-3524323). http://shop.cabothealth.com.au/tyrosine-pure-mood-food-75g - Website of the goods.
Manufacturer/supplier	Health Direction Pty Ltd
Summary of lab tests (if relevant)	
Ingredients (eg as listed on label, in advertising etc)	Tyrosine

Assessment against Food-Therapeutic Goods Guidance Tool²

Question	Assessment outcome
Q1 – product solely for oral use?	Yes $\boxtimes \to Go$ to Q2 No $\square \to Go$ to Q6 to determine if therapeutic goods
Q2 – covered by a s7 declaration that it is therapeutic goods?	Yes □ → Most likely a therapeutic good – provide reasoning and details below. Continue with assessment. No □ → Go to Q3

This form is designed to be used for assisting in the assessment of products at the food-therapeutic goods interface. It reflects the questions in the Guidance Tool (version May 2014). If consultation is required with other agencies (other than Customs or the AFP), use the Protocol.

A copy of the diagram from the Guidance Tool is at Attachment 3 of this form.

Q2 continued - Details of s7 considered and reasons why they are applicable or not	
Q3 – covered by s7AA declaration?	Yes ☐ → Most likely a therapeutic good – provide reasoning and details below. Continue with assessment. No ☐ → Go to Q4

Question			Assessment outcome
	Is the product "goods for which there is a standard" in the Food Standards Code? Q4 - goods for which there is a standard? Provide the food standard(s) you have considered and reasons why they are/are not applicable:		Yes $\square \to \text{Product}$ is likely not therapeutic goods No $\boxtimes \to \text{Go to Q5}$
which there is			Maybe the goods fall into Food Standard 2.9.5. But it is not compliant with this standard as 2.9.5 – 13 requires that the nutritional information is expressed per given amount of the good. The label of the goods do not include this (apart from one metric teaspoon = 3g of pure tyrosine – But I think this is insufficient).
	Q5(a) – What kind of goods is the product? (Eg an encapsulated L-Carnitine for fat metabolism)		A powder form of Tyrosine for the production of important brain chemicals that help enhance and support multiple functions.
Q5 - "tradition of use" as	product is prese	the form in which the nted? (eg is it a herb in psulated or tea in a	Powder
food in Australia or NZ?	Q5(c) – Is there a use of the product as "food for humans" in Aus/NZ in that form? Q5(d) – Is there a "tradition" of that use in Aus or NZ?		Yes $\square \to \text{Go to Q5(d)}$ No $\boxtimes \to \text{Go to Q6}$
			Yes □ → Most likely a food – provide reasoning and details below. Continue with assessment. No □ → Go to Q6
Q6 – within para (a) of definition of "therapeutic goods"	Q6(1) – determine what use the product appears to be for. Is the product: (If yes to (a), (b)	(a) Represented in any way to be for therapeutic use? (If yes, describe.)	It makes multiple claims that are therapeutic (Please see photo attachment). On the label of the goods it states: - Tyrosine is needed for the brain to make the neurotransmitters dopamine and noradrenalin. These neurotransmitters are needed for concentration, memory, satisfaction and mood control.
	or (c) go to		Tyrosine assists memory and mental performance during stressful conditions.

	Q6(2); if no to all, go to Q7)		Tyrosine is an amino acid (building block of protein) required by the adrenal glands to make adrenalin, which is needed for energy.
			- Tyrosine is used by the thyroid gland to make thyroid hormone, which controls the metabolic rate.
			On the website it states that tyrosine may assist with the following (which indicate these goods have a therapeutic use):
			- Mood disorders
			- Poor Memory
			- Poor focus and concentration
			- Food Cravings
			- Addiction
			- Low motivation
			- Low or unstable mood
			- Poor Thyroid Function
			- Inability to lose weight
			- Stress reduction
		(b) Likely to be taken to be for therapeutic use because of the way in which it is presented? (If yes, describe.)	Yes – Given the statements of fact about tyrosine provided on the label of the goods, consumers are likely to take these goods as therapeutic goods due to the way in which it is presented.
		(c) Likely to be taken to be for therapeutic use for any other reason? (If yes, describe.)	No
	THE PARTY OF THE P		Yes – multiple disease / ailments / defects identified (on the website). This is provided through multiple statements of fact:
	Q6(2) —		- Improve mood
	determine		- Increase focus and concentration
	whether that use of the		- Stress reduction
	product is	(a) Is any disease,	- Thyroid Function
"therapeutic use" ie: (If yes to (a) & (b), or (c) & (d) then it is I kely therapeutic goods; otherwise, go to Q7)	ailment, defect, or injury identified? (eg. Cancer, arthritis, wounds) (If yes, describe.)	- Reduced Cravings	
		- Addiction	
		- Low motivation	
	-	nerapeutic oods; other-	On the website it also states that tyrosine may assist with (alleviate ailment or injury):
	goods; other-		- Mood disorders
	wise, go to Q7)		- Poor Memory
			- Poor focus and concentration
			- Food Cravings
			. oou orunnigo

- Addiction - Low or unstable mood - Poor Thyroid Function - Inability to lose weight Healthy Weight On the label of the goods: - It states that it (tyrosine) is needed for concentration, memory, satisfaction and mood control Tyrosine is needed to assist memory and mental performance during stressful conditions Tyrosine is a mamino acid (building block of protein) required by the adrenal glands to make adrenalin, which is needed for energy Tyrosine is used by the thyroid gland to make thyroid hormone, which controls metabolic rate.
