**Subject:** Application A1034 – Advantame as a High Intensity Sweetener

As a NZ citizen I hereby submit my public comment on the application shown in the Subject of this email as follows:

Artificial sweeteners are commonly associated with consumer health risk factors and the alternative of pure natural sugar or stevia are already very suitable of all food and drink products. I would prefer all artificial sweeteners to be removed from all products and Advantame is no exception.

Unfortunately I will not be able to attend any meetings or other events relating to this proposal.

Thank you for your time and consideration,  
Leo Adler
