on behalf of my children Kali and Anthony how do not want this in their food !

SCANNED

### re application A1042

ACKNOWLEDGED

I would seriously like to object to the introduction of this GM corn re application A1042

It is my belief that there has not been enough independent study done to support the release of this major food crop into our country.

It has already been proven that these seeds cannot be contained and therefore the farmers who do not want to farm GM will not get a choice and this is not right in any language.

Also I am not happy about eating yet more chemicals and this time they cannot be washed OFF ! So therefore I will not have a choice eventually if I dont want to eat them and again this is not right.

Please think about these concerns as I believe that we should be banning GM not introducing more into our environment.

Sincerely Kristine Heather

Kristine Heather 19 Bethune street Queenscliff Vic 3220

I believe that this application should be rejected on the grounds that not enough independent study has been conducted

Also that it takes away the rights of farmers to remain independent producers.

REJECT

sincerely Kristine Heather
