Re: Application A1042 - Food derived from herbicide-tolerant Corn line  
DAS-40278-9

Dear FSANZ,

I COMPLETELY reject the assessment of Application A1042. NZ IS GE FREE and if we allow GE organisms into NZ we can NO LONGER CLAIM TO BE GE FREE!!!!!!

The FSANZ mission is: To protect, in collaboration with others, the health and safety of people in Australia and New Zealand through the maintenance of a safe food supply.

1. There is inadequate safety evidence on the Herbicide Tolerant 2,4-D Corn Line.

2. This 2, 4-D corn is a potential risk to my health. FSANZ is failing to maintain standards for a safe food supply for the citizens of Australia and New Zealand.

3. Independent safety studies published, after regulatory approvals of foods, in the last ten years show many problems with the introduction of GE into the food chain.

4. The application assessment does not address my safety as a consumer. I am concerned about the huge range of metabolic, immune and digestive effects that might occur once eaten.

5. No long term testing has been done. There is no data on its safety status; no maximum or minimum amounts of contaminants, residues, or other changes that may be present in plant food or that may be able to cause health problems.

6.This lack of safety data should put the application on hold until comprehensive safety studies are conducted that meet the International Codex parameters.

7.Ensuring dietary health is paramount for my family. It is important that groups like the poor, elderly, children and health-challenged are assured that the food they eat will not worsen their health conditions.

8.The lack of diagnostic tools for transgenic detection by health practitioners is a severe omission in preserving and ensuring public safety.

9.Allergies to food products have risen over the last few years. It is no coincidence that the rise has coincided with the introduction of transgenic approvals.

10. There is no data about how 2, 4\_D corn will interact, recombine, or transform with other GE foods

In the interests of me and my family's public health I ask that the Application A 1042 is rejected until full comprehensive safety data can be provided.

Yours sincerely,  
Christina McBeth (VERY concerned mother of 3)
