Application to amend the food standards code – Dow AgroSciences Australia Pty Ltd
DAS-44406-6 Soybean

Dear Sir, Madam,

Dow AgroSciences LLC (herein referred to as "DAS") and M.S. Technologies LLC (herein referred to as "MS Tech") are submitting an application to amend the Food Standards Code Standard 1.5.2 to approve the use of DAS-44406-6 Soybean; a new food produced using gene technology.

A copy of the complete application was sent to FSANZ on the 26th April 2012. Please disregard the application dossier, cover letter and cd that was sent on the 26th April 2012. As per email correspondence with Cathie Humphries (FSANZ) several amendments have been made to the actual application dossier, cover letter and cd. Please use this newer version instead.

Dow AgroSciences considers this to be a major procedure under the FSANZ assessment procedures. This application is expected to confer and Exclusive Capturable Commercial Benefit.

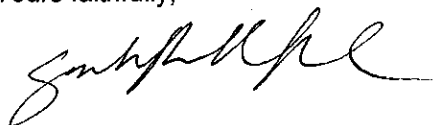

This submission includes a dossier which addresses all the items identified by FSANZ as necessary to establish food safety and the supporting reports (as per section 3.5.1 of the FSANZ Application Handbook, 1st August, 2011). Incorporated into the application dossier are the required checklists and a copy of the statutory declaration that was appended to the letter on the original application (sent 26th April 2012).

Only reports produced by Dow Agrosciences or The Dow Chemical Company are provided. All other citations are available but since these are from published literature have not been copied. Any or all of these citations will be forwarded if requested.

Please find the following attached to this letter:

- 1) 2 paper copies of the application dossier
- 2) CD with an electronic version of the application dossier including Attachment 1– Dow AgroSciences or The Dow Chemical Company produced reports.
- 3) Required Statutory Declaration (as a part of the application dossier).
- 4) Completed checklist (as a part of the application dossier).

Yours faithfully,

Sarah Russell French
