Subject:

Two lines for import to NZ and Australia. Soy bean and Cotton Seed.

I have sent submissions before like hundreds of other people but you do not listen. I keep sending you information like hundreds of other people showing how toxic these GE foods are to the soil, to animals and to humans and you still let them in.

- 1. You are paid by the Governments of New Zealand and Australia as a from for Monsanto, Dow and Syngenta and others.**
- 2. The NEW Zealand Governments work with Australia Britain Canada and the USA as a western cabal u7nder the One World Government who promotes corporate power to the distribute of this earth and humanity in general.**
- 3. The regulatory authorities are generally biased as noted above and the FDA is totally corrupt . The USDA is the same because the Federal government have allowed Monsanto people in to positions of power because that is the plan.**
- 4 There is plenty of evidence that the One World Government wishes to reduce the world population down to less than one billion. Since one effect of some GE foods is to cause sterility this is obviously part of the plan.**
- 5. Many other Governments are trying to reduce, stop growing , stop importing GE foods and the people of the world are desperate to stop thyis evil process and consequences getting any worse.**
- 6. We as people of the world are joining together with more and more power to bring down these corporations and restore sanity to the health of the food we have to eat. However there is evidence that this is part of the plan to feed us poisonous and non nutritious foods and then the drug companies will make more money.**
- 7. I TOTALLY OBJECT TO THESE FOODS ALLOWED INTO NEW ZEALAND IN ANY FORM WHATSOEVER. Not for animal feed or human feed. . We do not need them, they are not cheaper to grow, they contaminate the earth, they are poisonous all that live on the earth. It is an evil plan than only the people can stop and we are determined to do so.**
- 8. Over the last year I have sent you pages of evidence showing the toxic effects on GE food and you again and again use pseudo scientific writings on your website. Who are you trying to fool?**
- 9. Do not ever say again that you let stuff in because the FDA sais it is OK. As above they are corrupt and all part of the plans mentioned.**
- 10. You labelling efforts are dismal anyway. What about the increase in Glyphosate levels in in the foods. The FDA has just increased the allowable levels by a massive amount and now it is all legal again. Who asked for this Monsanto of course. How hypocritical is that. That alone shows the above to be true. You can now say you do not have to worry about the Round up levels**

because the FDA sais they are OK. Perhaps that is enough said. Hugh Halliday. [REDACTED]
