**12. Submission Text:** UNDER NO CIRCUMSTANCES MUST GENETICALLY MODIFIED FOOD SOURCES BE ALLOWED TO BE PLANTED IN AUSTRALIA. There have been many studies, especially recently, that show genetically modified food is both dangerous and ineffective including: . dangerous side effects to laboratory animals fed GM food . poor yield from GM food farms . build-up of resistance to herbicides meaning the necessity for use of increased amounts Further, most populations across the world - including Australia, do not want Genetically Modified foods. Thorough scientific research must be done to ensure the total safety of any such change to our food sources. Food security is critical. The safety of people is critical. These must be safe-guarded at all costs. I demand that this application be thrown out. PS. your system would not allow me to submit until I added an attachment.
