My submission for food standards

Please no gmo's we can hardly tell these days as everything is disguised under another name and we feed these products to our young children with god knows what side effects long term just so these companies can still make money , if it's in there fine, just label it clearly so we have the choice to look for another alternative.

**Subject:** Food Derived from Herbicide tolerant Soybean event SYHT0H2

Application No. is A1081 The name of the application is– Food derived from Herbicide-tolerant Soybean Event SYHT0H2

Of particular relevance is FSANZ's own guidelines, which state 'Where possible, submissions should contain scientific

evidence rather than conjecture to back up any assertions as FSANZ is required to use the best scientific evidence available

in its decision-making processes'.

We presume the applicants are also expected to provide the same level of scientific evidence rather than conjecture.

No to GMO in Australia

RE: Food derived from Herbicide-tolerant Soybean Event SYHT0H2

I am writing to express my concern about the introduction of foods containing GM soybean products into the Australian food supply.

Genetically modified foods have never been proven to be safe for human consumption in any long term study. This is a fact and not simply my opinion. The famous geneticist David Suzuki explains this very well here: <http://www.youtube.com/watch?v=2mBF1OOPdTo>

You'll notice that the author of the Safety Assessment document in the application has chosen their words very carefully. For example they have written:

"Soybean derived products have a range of food and feed as well as industrial uses and have a long history of safe use for both humans and livestock"

Notice they use the term "Soybean" NOT "GM Soybean" or "Soybean line SYHT0H2". Of course soybeans are safe to eat, but GM soybeans have never been proven to be safe, hence the author can't make that claim and instead refers to soybeans in general.

The Safety Assessment document is very technical but does not even once mention any long term human testing. This is because there has been none.

While the long term effects of eating GM foods are unknown, exposing the Australian public to this potential health hazard would be reckless and necessary.

Please put the health of the Australian public first and do not allow GM soybean products to enter the Australian Food Supply.

Yours sincerely  
Jeannette Bazeley

**Subject:** The Sierra Club Genetic Engineering Web Site

I am Opposed to genetically engineered foods! I personally know 300 people who are Opposed to genetically engineered foods. In California, five counties voted to ban growing genetically engineered foods!

The Sierra Club, representing 2,100,000 members, is Opposed to genetically engineered foods! Greenpeace is Opposed to genetically engineered foods! Millions of Americans are Opposed to genetically engineered foods! Europe is Opposed to genetically engineered foods! Japan is Opposed to genetically engineered foods! Other countries are Opposed to genetically engineered foods!

Please do NOT use genetically engineered foods! Why force on people something they don't want?

One website calls Monsanto the most hated company on Earth! Another Website calls genetically engineered foods the largest food experiment in the history of the world!

Genetically engineered foods are Dangerous tampering with nature! We MUST STOP genetically engineered foods!

Sincerely, Arthur Tesla
