Subject: irradiation of blueberries

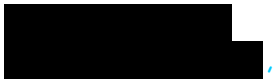

I would like to write to ask you to consider **not** irradiating blueberries and raspberries for the following reasons:.

- Not only does this change the chemical makeup of the berries, but we will also not be able to tell which berries have been irradiated or not.
- We do not fully understand the effects of consuming irradiated foods- with chemical alteration we do not know how it will affect our bodies (neurological or cancer producing effects???)
- There are other alternatives for pest control

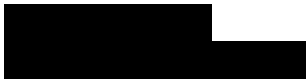

Thank you,

Ineke de Graaf

Australia

Hebrews 6.19-20 We have this hope as an anchor for the soul, firm and secure. It enters the inner sanctuary behind the curtain, where our forerunner, Jesus, has entered on our behalf.
