1. **Assessment Report Number:** A1116
2. **Assessment Report Title:** GM corn line application
3. **Organisation Name:** Sue Zeckendorf
4. **Organisation Type:** Individual
5. **Representing:** Self
6. **Street Address:** [REDACTED]
7. **Postal Address:** [REDACTED]
8. **Contact Person:** Sue Zeckendorf
9. **Phone:** [REDACTED]
10. **Fax:** N/A
11. **Email Address:** [REDACTED]

**12. Submission Text:** As an interested consumer, I want to raise the likely impact of allowing herbicide-resistant corn to be consumed. I can see that tests performed on the modified crops show they are safe to eat and I am not surprised by that. However, the purpose of creating herbicide-resistant crops is so that toxic herbicides can be used on them. I am greatly concerned that the toxic chemicals used on the plants will make them unsafe to eat. The testing you have done appears to have only checked the crop and not the impact of what will be sprayed onto it. I am concerned that allowing these plants to be used as commercial crops will endanger the health of all who eat them because of the herbicides used on them. I would like assurance that this will not be allowed.
