I wish to object to allowing genetically modified food to be allowed into New Zealand under any pretext. After many years of gmo's being trialled and grown overseas there has been no evidence that it has increased nutritional food value, or is proven safe for long term food use. Our organic farming will be put at risk if any gmo's are allowed to be established in New Zealand. If by any chance this is allowed into our land it must be clearly labeled as a GMO product, also any product made using this potato must be clearly labeled as containing GMO products.

Yours sincerely,
Mervyn. D. Smith
