**Re.** A1193 All 'fresh' fruits and vegetables to be Irradiated

**'Submission on A1193 Irradiation of all fresh fruit and vegetables'**

**I wish to challenge this proposal on the following grounds:**

Radiation damages the food value of fruit and vegetables and their nutritional value

.especially.

By irradiating all fruit and vegetables, this is forcing people to either not eat these foods or eat damaged food without its normal food value. Clearly this will adversely affect the health of all those in this situation.

By denying people their normal nutrition constitutes criminal assault as it is denying them adequate nutrition.

At the very least all organic and bio-dynamically produced food should be exempted from this proposal.

All irradiated food must be clearly labeled as such.

I wish to protest in the strongest possible terms to the concept of irradiating the food, and the almost total lack of opportunity to allow for public comment. On this basis this proposal lacks any credibility and should not proceed .

This submission is very limited as there is no time to create a detailed document, but the issue is so important anything is better than nothing considering the far reaching consequences of the proposal.

Yours sincerely,

[REDACTED]
