Subject: 100% AGAINST FOOD IRRADIATION

Categories: [REDACTED]

Hello Food Standards

1) I see this as sheer lunacy and a waste of public funds.

I am 100% against food irradiation. I have only seen this at the last moment and put together this response.

We have the nutritional value of food so degraded from modern farming methods and you want to further add to this with this process.

The irradiation damages vital nutrients and we already suffer too many health problems from that.

2) After a year where we have seen so much failure by government all around the world over Covid, something that would have killed far less than the 2017 flu season in Australia with far less cases till the negligence of the Victorian government and authorities added around 700-800 extra deaths (their lock downs and mask did the damage, i can send you 20-30 science links that show mask are ineffectual if you want), but we see them used a societal control tool. (In 2017 1255 died of the flu and there were 221,000 reported cases to medical people, source ABS)

Many other Australians and myself have had enough of government abuse, and I see this food irradiation as another aspect of that. We should have trials for what's gone on with Covid. I brought this up so you know I don't see present matters in the world lightly and this includes food irradiation.

3) This was brought to my attention by the Nexus newsfeed. **I see this whole matter as something that the government once again against the people wants to slip in behind the scenes.**

<https://www.nexusnewsfeed.com/article/food-cooking/irradiation-of-all-fresh-fruits-and-vegetables-have-your-say-1>

4) I am citing some links from Dr Mercola. I know many would say he is into vitamins and what does he know.. If you read the vitamin D information on Covid you will know our whole mainstream medical system has botched so much their on covid and other matters with a criminally low RDA. Dr Mercola in 1999-2000 said cox2 inhibitors would not remain on the market long as they would cause heart attacks and death The corrupted FDA let them go ahead and in 2006 was forced to take Vioxx off the market after 55,000 deaths and 138,000 heart attacks. So Dr Mercola was way ahead of health authorities we are supposed to trust. **I bet you the families of all those Vioxx victims wish he had been running the FDA. Then Merck is allowed to get away with a paltry usd 4.85 billion for that incredible amount of death and injury. The problem is we never have enough proper unbiased research, this gets pushed and then we have to deal with the damage, and governments and corporations never pay enough for the harm they caused.**

All Dr Mercola article have data sources at the bottom.

<https://articles.mercola.com/sites/articles/archive/2009/04/25/irradiated-food-causes-brain-damage.aspx>
<https://articles.mercola.com/sites/articles/archive/2011/11/05/why-are-your-spices--seasonings-exposed-to-half-a-billion-chest-xrays-worth-of-radiation.aspx>
<https://www.organicconsumers.org/sites/default/files/what%27s%20wrong%20with%20food%20irradiation.pdf> Why are you pushing THIS, if even 1/10-1/3rd of this is right. YOU REALLY NEED TO READ ALL THE DETAILS.

http://www.laleva.cc/food/hazards_gerbis.html

<https://greengarageblog.org/17-major-advantages-and-disadvantages-of-food-irradiation> I dont think the advantages out weigh the disadvantages.

5) I have included this on nuclear bomb testing and the effect on soils in the USA. The harm is enormous but governments and arrogant science people don't do their jobs and other pay the cost and I see the same here with food irradiation, what we pay in the long run

<https://www.nexusnewsfeed.com/article/climate-ecology/us-a-bomb-tests-kill-more-americans-than-ww1-ww2-vietnam-combined/>

Video: <https://youtu.be/T-o4h0eoLlc>

There needs to be massively more REAL PUBLIC DISCUSSION ABOUT FOODS IRRADIATION, I SAY 100% "NO" to food irradiation.

Regards

p.s. I have put a few links on vitamin D below, if our health authorities miss this "elephant in the room", they have tunnel vision , corrupted or have agenda's.

No covid, no need for vaccines?. But we have very questionable vaccines being forced down our necks. We see HCQ and ivermectin ignored and improperly vilified. See this USA senate hearings 1-2 days ago. I hope the lawsuits are massive. How can we trust government, authorities and medicine when they have ignored requests for decades to raise the RDA and the deaths caused is enormous.

<https://www.youtube.com/watch?v=Q3PA7jLqNAg> Senator Rand Paul and his father former Congressman Ron Paul are both doctors.

<https://www.youtube.com/watch?v=k8RyV3VEDKI>

<https://www.youtube.com/watch?v=Z2fzoF3qB3k>

<https://www.youtube.com/watch?v=fSL7sqOudoE>

<https://www.youtube.com/watch?v=YgOAaLmoa68>

Vitamin D- Criminally low RDA for decades.

if in fact if this had been raised how much could have saved on bad vaccine programs and would our immune systems be so strong we could had so much more. The whole mainstream push has not been to make our immune systems stronger.

<https://pubmed.ncbi.nlm.nih.gov/20352622/> an estimate of the economic burden and premature deaths due to Vitamin D deficiency in Canada. IF THIS WAS DONE WORLD WIDE 340k Canadians saved, 3.4M USA, 240K Australia, etc. SO VITAMINS ARE NOT EXPENSIVE URINE, ADD THIS AND COVID & MORE IS OVER.

2010: The estimated benefits in disease reduction were based on increasing the mean serum 25(OH)D level to 105 nmol/L. **It is estimated that the death rate could fall** by 37,000 deaths (22,300-52,300 deaths), **representing 16.1% (9.7-22.7%) of annual deaths** and the economic burden by 6.9% (3.8-10.0%) or \$14.4 billion (\$8.0 billion-\$20.1 billion) less the cost of the program. It is recommended that Canadian

health policy leaders consider measures to increase serum 25(OH)D levels for all Canadians. Wow and it was ignored

<http://www.orthomolecular.org/resources/omns/v16n34.shtml> Vitamin D > 75 nmol/l , no effect from Covid. See dose of this nutrient you really need.

<http://www.orthomolecular.org/resources/omns/v16n49.shtml> More info revised 3 months later.

<http://www.orthomolecular.org/resources/omns/index.shtml> Blow your minds on a few of these articles.

Get vitamin D now, no doctor needed, take back your power and live much longer.

<https://www.oliversrealfood.com.au/products/buy-online-vitamin-d-eckhart-tolle> 300+ references and see how many diseases could have been much far less than with a proper RDA level like 105 nmol/l, most improvements would be at 75 nmol/l .

The list covers breast cancer, colon cancer, cancers, MS, ADHD, rickets, depression, asthma, schizophrenia, influenza, pneumonia, osteopenia, osteoporosis, cardiovascular disease, mental health conditions, all-cause mortality, altered immunity, and auto-immune diseases, and more.

Yet the RDA has been left criminally low for decades.

plus new articles.

<https://articles.mercola.com/sites/articles/archive/2020/12/07/vitamin-d-to-prevent-tumor-death.aspx>
The graphs and data are mind blowing.

<https://drsircus.com/general/vitamin-d-ivermectin-better-solutions-to-covid-than-vaccines/> It's clear, no death from the coronavirus at vitamin D blood concentrations above 34 ng/ml (85 nmol/l).

NOT EVEN GETTING ONTO HIGH DOSE VITAMIN C and its suppression.
