SUBMISSION – Application: 30 October 2020 [140–20] A1193 – Irradiation as a phytosanitary measure for all fruits and vegetables

Dear Sir/Madam

I am writing in regard to the Application A1193 – Irradiation as a phytosanitary measure for all fruits and vegetables.

I am an Australian man, and wish to voice my strong OBJECTION to this application. Studies have found that irradiation of food may affect its nutritional value and it is for this reason that I do not ever use a microwave oven. By the same token, I DO NOT wish to eat irradiated dead food.

I DO NOT CONSENT to my food being irradiated. At the very least, consumers need to be given a choice of whether or not they purchase irradiated foods – there needs to be a wide selection of non-irradiated foods and irradiated foods need to be CLEARLY MARKED.

I am complaining that the submission process you have provided is very difficult to navigate, no doubt because you want to make it difficult.

Thank you for your consideration.

Yours sincerely and without prejudice
