Subject: Application A1039 - Low THC Hemp as a Food

I refer to the above application and wish to inform you that I can see no valid reason for banning the use of hemp in food, on the proviso that is not genetically modified/engineered.

I consider that the rejection of the previous application in 2002 due to concerns by State, Territory and Federal health ministers that the availability of hemp foods may increase consumer acceptance of illicit Cannabis use and pose problems for drug enforcement agencies was based upon irrational, unsubstantiated fear, ignorance and prejudice.

Regards
