Subject: Approval of hemp seed for human consumption

Categories: Blue Category

Dear Sirs,

Please approve the use of hemp seed for human consumption. It is completely harmless and is such a healthy product, which would be of great benefit to everyone who consumes it. Why is Australia the only country where it is not allowed?
Further, I understand that the hemp plant has many industrial uses, improves the soil and would be of great value for Australian agriculture.

Yours faithfully,
Joe Holver
