Categories: Blue Category

Metcash's horticultural and food safety teams have reviewed the FSANZ document (31st May 2011) supplied as part of this proposal.

The Proposal document has adequately covered the 'horticultural risks' well within the key risk assessment concerns ("Evidence of Risk") listed already in page 4, and if adequately addressed in the proposed document then it should proceed smoothly.

We would also **take the opportunity** to raise a number of extra additions' of risk concern for consideration.

Metcash after conducting many Fresh reviews would recommend the following additional risk checks be included...

- Suitability of type of fertiliser (if using recycled materials)- recycled effluent, recycled human or animal source
- Effective Storage and handling controls of pest control chemicals
- Effective Storage of any other toxic chemicals on site, etc

If you need any more information, please contact myself or George Passas on 0409 328 895.

Regards

Steven Newton (GM Risk - Metcash)
