To Standards Management Officer

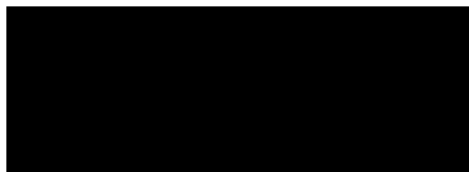

**Submission to FSANZ Proposal P1022: Primary Production and Processing Requirements for Raw Milk Products**

The SA Dairyfarmers' Association (SADA) would like to fully support the position that Dairy Australia has made to FSANZ in relation to the sale of Raw Milk Products. SADA believe it is important that we maintain a national approach to the management of Raw Milk and Raw Milk Products.

The issue of Raw Milk trade has received increased focus in SA in the past twelve months with a case before the courts. This highlights the need for clear standards that do not allow for loop holes to be exploited. Strong clear standards are needed to protect the public from the risks of Raw Milk.

The dairy industry is a national industry and we believe it is important to have consistent national outcomes.

Yours faithfully

David Basham  
President SA Dairyfarmers' Association
