Subject: Views on proposal 1050

I am writing this email to give my views on the Proposal 1050, if adopted I would like to say the following.

- I support the proposed transitional period of two years and the 'stock in trade' exemption
- I believe producers should have the choice of where to place this warning
- I strongly believe if this is required the words "Pregnancy Advice" be used or something that is clearly related to pregnancy only
- I would request that the size of the label be reduce to match the allergen labels
- I would like to know potential costs involved to make these alterations
- I personally do not believe in the requirement for this warning as I believe in personal responsibility in matter such as this.

Kind Regards

M
