To whom it may concern,

Polling shows most Australians, and global citizens don't want to eat genetically modified (GM) foods. I am one of them. All GM foods should be independently assessed for their health and environmental hazards and risks, be labelled as GM, and be traceable. This will allow farmers, food producers, retailers, and shoppers to avoid them, for many important reasons.

I strongly oppose changes to the Food Code that would allow a wide range of GM foods to be sold without safety assessment or labelling. Labelling is of particular importance to me, as it gives me the information I need to eat and feed my family in accordance with my beliefs and values.

Please put people's health and freedom of choice above commercial interests.

Yours sincerely,
