**Subject:** PROPOSAL P1007 - No to pasteurization of Goat milk and Cheese!!!

**Categories:** Blue Category

To whom it concerns,

In regards to Clause 15 of PROPOSAL P1007. I want to put my word against this clause which requires all milk to be pasteurized, especially goats milk. I was brought up on raw goats milk and am a regular buyer of Gourmet cheese. Nothing bad has happened to me! If the right procedures are followed it is safe and beneficial for people to drink it.

Pasteurization of Goats milk would only serve get rid of the good and will only continue to disadvantage the already disadvantaged Australian cheese industry.

Also in your march to get ride of raw milk you are killing of the business of the small artisan cheese & milk manufacturers. "Destroy jobs, destroy good cheese" is your war cry as you come down the road.
